TWO DEATHS IN

Diphtheria Carries Off Children of Joseph Everett.

FAMILY IN DIRE DISTRESS MORE

FURNITURE CAN BE DUPLI-CATED FOR LESS THAN \$10.

One of the most pathetic cases of lives in a three-room house near the corner of Ninth South and Fifth West. The family consists of Everett and his wife, and three children. Last Saturday there were five children. Two of them have died since then, of diphtheria.

The furniture in the house can be duplicated in any second hand store for less than \$10. It consists of a bed, stove, a few chairs and dishes, and a home-made table. The bed has no mattress or springs, the few blankets owned by the family being laid upon

When Fumigator Woodard first visited the Everett home he found one of the children, who has since died, lying on the bed, the edges of the slats working through the rough blankets, irritating the emaciated body of the little sufferer. One blanket was under the child, and a torn and soiled one over it. In the kitchen, reposing on a blanket on the floor, was the second child, who has since died. All the provisions the family had in the house yesterday were five pounds of flour and a large piece of pork. The fuel consists of little pieces of coal.

Mr. Everett said he came to Salt Lake from St. George last July. He works when he can, his earnings aggregating \$2 per day when he finds employment. For the past month he has not been able to find anything to When Fumigator Woodard first vis-

employment. For the past month he has not been able to find anything to do. His last job was on the News building, where he received \$2 per day. His rent is \$5 per month.

PLENTY OF WORK.

Men Who Really Wanted to Labor Got the Chance,

Denver, Jan. 10 .- The Republican today says:
General Manager A. C. Ridgeway of
the Colorado-Utah Construction company, which has charge of the construction work of the new Denver,
Northwestern & Pacific Railroad company, emphatically denies the truth of the complaint made to Chief of Police Armstrong of this city that men shipped into Denver from Ogden, Utah, by a labor agency to work on the new railroad had falled to secure employment when they reached Denver. He said that every man who had been sent to Denver by that or any been sent to Denver by that or any other employment agency, and really desired to work, had been employed by the contractors which have charge of the construction of the first fifty-six miles of the new railroad.

Governor James B. Orman, of the firm of Orman & Crook, which has the contract for building nineteen and one-

firm of Orman & Crook, which has the contract for building nineteen and one-balf miles of the road, made a similar statement concerning the employment of men, and said that within the next ten days, steady work would be guaranteed all men who cared to come to Denver, until the working force on the divisions he is building had reached 2,000 men. Governor Orman also said that the Ogden agency had orders from his firm to ship men to Denver. An additional order for a shipment of twenty men daily has been given that company, to be in effect until the camps of that firm are fully established, when a carte blanche order to ship in all men available will be given.

WILD PANIC ENSUED.

Explosion of Dynamite Near House

of Correction.

Philadelphia, Jan. 10.—One man was killed, half a dozen injured and the women's wing of the house of correction partially wrecked by the explosion of several sticks of dynamite in No. 3 shaft of the new filtration plant at Holmsburg, a suburb of this city. The déad man was blown to pieces. The women's wing of the house of correction adjoins the shaft house. The women were at breakfast when the explosion occurred and when the building began to shake there was a wild rush to get out, resulting in panic. The women were gotten out in safety and quickly escorted to another part of the building. Eight hundred panes of glass in the north wing of the house were broken and the force of the explosion was felt for many miles.

The injured were taken to a hospital, after having their wounds dressed at the house of correction infirmary. of Correction.

LITTLE GOOD WILL RESULT.

British Opinion of Chamberlain's

London, Jan. 10.—Colonial Secretary Chamberlain's tour of South Africa is beginning to attract greater attention. Both at Pretoria and Johannesburg he received great evations, an interesting feature of which was the intermingling of stars and stripes and union jacks as a compliment to Mrs. Chamberlain. The Boers' suggestion, however, are creating a certain feeling of uneasiness among the government supporters here, who ubilicly and privately express doubt whether any good will come of the trip. Briefly, Mr. Chamberlain so far has not mily declared practically that no further concessions can be made by Great Brittin, but he has also upbraided the Boers for their lack of appreciation of what Great Brittin has already done. To use the expression of a paper which has always been his warm supporter, Mr. Chamberlain has "allowed himself to be Brawn early in the game." South African Trip.

DON'T LIKE TERM FAMILY IN WEEK "INSANE ASYLUM"

Directors Want State Institution Called a "Mental Hospital."

MONEY IS ASKED

BOARD WISHES APPROPRIATION FOR SEVERAL CHANGES.

abject poverty and actual distress directors of the state insane asylum which has come under the notice of recommend that the present law govthe board of health for years was erning that institution be changed in called to its attention yesterday by many ways. They would like to see Fumigator R. F. Woodard. It is in it called "mental hospital," instead of the family of Joseph Everett, who "insane asylum," and desire that the

> Under the caption "recomm tions," the board asks for the following appropriations for the next two

years: Improvement and repairs......
New buildings New draw plate oven for bak-

Total ... The expenses of running the insti-

The expenses of running the institution during the past two years amounted to \$105,864.18. The appropriations made by the last legislature have not all been expended. After the December, 1903, bills have been paid there will be a balance on hand of about \$23,000.

During the biennial period the average daily cost for the care and treatment of each patient was 22.7 cents. That is a slight increase over the cost of the former biennial period, due to the subsequent advance in the cost of provisions. The board found it impossible to complete the two detached wards with the \$18,000 appropriated, so an additional \$4,000 is asked for.

At the close of the biennial period there were 350 patients in the asylum, as against 214 two years ago. It is anticipated that during the coming period the number will be increased to 390, and, as the astitution has a capacity for only 330, it is urged that the legislature not stint the board in the use of funds to enlarge the asylum.

ANOTHER WU TING FANG.

What Is Expected of Baron Speck von Sternberg.

Berlin, Jan. 10.-Baron Speck von Stern Berlin, Jan. 10.—Baren Speck von Sternberg will be given ample rank when he goes to Washington. He will not be a simple charge d'affaires, but from the beginning will have a special rank, probably that of ambassador extraordinary, so that, although Herr von Holleben will ratial for an indefinite period the title retain for an indefinite period the tith of ambassador to the United States Baron Speck Sternberg will really have Baron Speck Sternberg will really have a rank equal to or superior to that of Dr. von Holleben. Since the emperor has been giving special attention to Germany's relations with the Unified States he has said on two or three occasions, it is understood, that Germany ought to be represented at Washington by a personality which would win the regard of the American people as well as the confidence of the American government. His majesty on one occasion alluded to the personality of Wu Ting Fang, the former Chinese minister at Washington, as being of exceptional value to China.

Hay and other members of trailon.

The appointment seems to have come as a complete surprise to Baron von Sternberg, for he told the correspondent of the Associated Press that he had already started for Calcutta when a telegram caught him in Paris. He added that he was very much pleased to return to the friends he had left in the United States. Baron Speck von Sternberg was born at Leeds, England, and did not see germany until he was 7. His father was a naturalized Englishman and his mother

It is very difficult for one who has not looked closely at its location and extent to appreciate the peculiar advantages of California. In latitude it extends from the southern line of South Carolina north to the southern line of Massachusetts, covering on the Pacific slope a corresponding coast line extending inland on an average about two hundred miles. Take the Atlantic coast line covering the same width exextending inland on an average about two hundred miles. Take the Atlantic coast line covering the same width, ex-amine it critically, and see what a hive of industry and what an immense popu-lation is covered.

lation is covered.

Lay a similar area in the same latitude in the Mississippi valley, running from the northern line of Louisiana to the northern line of Illinois, and see what an agricultural region it outprises. And yet California has many notable advantages over either of three tracts. In variety and fertility of soil, in climatic conditions, it stands far in the lead.

the lead.

It is true that some portions of the state are unfitted for the purposes of home making, but most of these regions are of the nature of great natural parks—breathing places for the multitudes who shall eventually make their homes in this favored state.

Nor can it be that many years will elapse before this inviting field will be occupied. No part of our country offers wider fields for good investments—investments that are entirely safe and that are sure of returning a good profit. Far-seeing men have already secured interests there, but there are yet many thousands of acres awaiting the "coming man," whose enterprise will bring its rich reward.

A COMMON COLD its rich reward.

Is taken by the skin becoming colder than is natural. The instant a chilly sensation is felt the mischief is done. To "break up" the Cold, and to prevent Grip and Pneumonia, use Dr. Humphreys' Specific "Seventy-seven,"

that the checked circulation has been restored, the blood starts coursing through the veins, and the danger is passed. "77" breaks up Colds that "hang on"—

Washington, Jan. 16.—A cable-gram received from Minister Bow-en today stated he would sail from La Guayra for the United States tomorrow, and would be in Wash-ington within a week or ten days. The minister also stated in his message that considerable distress is being feit through the operation of food supplies.
